To Whom It May Concern:

For several years I have had the privilege of working with Bill Peltier. Bill has guided our firm through the evolving requirements of the IBC and Special Inspections. He has a comprehensive understanding of many types of building structures and how all building systems must be coordinated with the structure. More importantly, Bill takes a common sense approach to structural design. He understands that the code book is not just an instruction manual from which to draw a design or find a solution. With his firm understanding of structural engineering and his practical approach to his profession, he continuously develops creative solutions providing the highest quality product while saving Owners unnecessary construction cost resulting from an over designed structural system.

Bill has led us to expect the highest level of structural engineering services for our designs and our clients. Before working with Bill, we often had a lack of involvement from our Structural Engineers after the building permits had been issued. Bill understands that his responsibilities do not end until the Owner has moved into the building and is completely satisfied. Every project has challenges through the construction process. Bill's involvement throughout the construction keeps the job moving and on schedule. His willingness to work with the General Contractor and his ability to think "outside the box" has enabled us to provide solutions that have literally saved project budgets and schedules.

Simply put, Bill is "that guy" you call when you need something done. He also demonstrates the most important aspect to any profession by doing what he says he is going to do, when he says he is going to do it. Bill will not stop working on an issue until he has satisfied his client. We at JKH Architects highly recommend Bill Peltier for structural engineering, special inspections and construction administration services.

Sincerely,

A handwritten signature in black ink that reads "William J. Peltier". The signature is written over a light blue and white graphic element that resembles a stylized 'W' or a mountain range. Below the signature, the text "WILLIAM J. PELTIER" is printed in a blue, sans-serif font, and "ARCHITECTS" is printed in a smaller, grey, sans-serif font below that.
